Peruvian Syrup. RESTORED TO COMPLETE HEALTH

Dear Sir—From early youth I was in feeble health, troubled with humor in my blood, weakness and debility of the system generally; was unable to labor much, and only at some light business, and then only with great caution.

Seven years ago the past Storing I had a severe attack of Diptheria, which left my limbs paralyzed and useless, so I was unable to walk or even sit up. Noticing the advortisement of Practytas Strater I concluded to give it a trial, and to my great joy soon found my health improving. I continued the use of the system until three bottles had been used, and was restored to complete health, and have remained so to this day. I attribute my present health entirely to the use of Practytas Synth, and hold it in high estimation. I cannot speak too highly in its praise I have in several cases recommended it in cases very similar to my own with the same good results. Yours truly. CHAS. E. PEARCY.

AYERS' HAIR VIGOR, For Restoring Gray Hair

To its Natural Vitality and Color-

Advancing years, sickness, care, disappointment, and hereditary predisposition, all turn the hair gray, and either of them incline it to the hair gray, and either of them incline it to shed prematurely.

ATERS' HAIR YIGOR, by long and extensive use has proven that it stops the falling of the hair immediately; often ronews the growth, and always surely restores the color, staen faded or gray. It stimulates the nutritive organs to healthy activity, and preserves both the hair and its beauty. Thus brashy, weak or sickly hair becomes glossy, pliable and strengthened, lost hair regrows with lively expression; falling hair is checked and stablished; thin hair thickens, and faded or gray hair resume their original color. Its operation is sure and harmless. It cures dandruff, heals all humors and keeps the scalp cool, clean and soft—under which conditions diseases of the scalp are impossible.

As a dressing for ladies' hair, the Vision is praised for its grateful and agreeable perfume, and valued for the scalp instre and richness of tone it imparts.
